Subject: opinion on settlement

I doubt this will have an impact, but as a computer professional, I think the settlement is a joke. Microsoft is obviously anti-competitive, and Windows XP is a slap in the government's face. My MS Passport id is now tied to my Win XP user account? Come on. The remedies do nothing to take away the benefit of microsoft's anti-competitive practices. I am forced to root for the remaining states and the EU. Windows is not a bad product, but Microsoft is a bad company.

Thanks for your time.
